

## *AiP Quality and Environmental Policy*

**Purpose:** AiP specialises in the design and manufacture of thermoforming packaging for the pharmaceutical, electronic and retail markets.

**Context and Strategy:** AiP operates in a competitive environment. We will regularly review the context of our business to help ensure we achieve our company strategy. Our aim is to develop the most effective production processes and procedures to enhance customer satisfaction and loyalty and grow our existing customer base.

**People and Process:** We select excellent people who participate in providing for our customer needs in all its aspects. Our people collaborate to constantly challenge and improve our value stream so that we are always prepared for the future. We will provide a safe working environment for all our employees. All our employees understand their responsibility in ensuring that activities under their control conform to our environmental standards and that our objectives are achieved and maintained.

**Quality:** We provide a manufacturing process that can provide for our customer needs. We use our quality objectives to improve our customer perception and as a means of measuring our quality performance. We will comply with and exceed our responsibility for ensuring that our products and services are acceptable for our customers. We will strive for continual improvement of our quality and environmental quality system.

**Environment:** AiP recognises the importance of environmental protection and reducing the consumption of natural resources and is committed to meeting this challenge.

The aims of our environmental policy are as follows, be aware of and comply with all legislation, regulations and codes of practice on all environmental matters that are relevant to our operation, and to inform our staff accordingly.

As far as is reasonably practicable and consistent with our customer's instructions, carry out our activities using methods and equipment which minimise environmental impact.

Conserve resources by promoting the recycling of materials, reducing waste by carefully controlling process and procurement, storage and disposal, monitoring energy consumption and minimising road vehicle movements. Ensure that the disposal of all waste material complies with the Controlled Waste Regulations. Review on a regular basis the progress made in achieving our environmental objective and targets.

**Ethics:** We show personal integrity in our dealings with each other and the outside world. We will work to reduce any adverse impact of our business on the environment. We will ensure we will comply with Irish Regulations regarding child labour as set out in our Health and Safety Manual.
